SUMMARY

Full Stack Engineer specializing in MERN and AI-native systems, with 5+ years of experience building scalable web, mobile, and real-time applications. Strong expertise in **LLM-powered workflows, RAG pipelines, and distributed systems** to automate complex engineering and business processes.

Built and scaled **0→1 products with real users**, including AI systems that query production data, analyze system behavior, and accelerate debugging. Delivered measurable impact through **latency reduction (15 min → 5 sec)**, **cost optimization (55%)**, and **product growth (150% increase)**.

Passionate about building **intelligent, scalable systems** at the intersection of software engineering and AI.

EXPERIENCE

PickYourTrail

11/2024 - Present

Software Developer (SDE II)

Chennai, India

- Owned **end-to-end mobile app development (React Native)**.
- Migrated React Native **0.76 → 0.82**, improving **performance and stability**.
- Revamped **hotel search and booking flow** on web and mobile, resulting in a **150% increase in bookings**.
- Built **cancellation & reschedule policy module** (core business workflow).
- Developed **Reports module (web)** for operational insights.
- Automated **GST invoice retrieval from Indigo flights**, replacing manual workflow. Saved significant manual effort across **100–400 daily bookings**.

BahiKhata Inc

11/2023 - 11/2024

Fullstack Developer

Noida, India

- Owned **end-to-end mobile app development (React Native)**.
- Enabled **offline sync functionality** for the mobile app, allowing transaction recording without internet access.
- Implemented **multi-session sync** to help MSMEs organize transactions across multiple devices.
- Developed **SMS parsing** to automatically fetch and record transactions within the app.

Klenty

02/2023 - 11/2023

Full Stack Developer - Infra

Chennai, India

- Implemented **Zipkin distributed tracing** for system-wide observability.
- Built **real-time mail tracking system** → reduced latency from **15 min → 5 sec**.
- Designed **request ID attribution system for MongoDB queries**.
- Built **slow query detection pipeline** for MongoDB enabling precise debugging.
- Enabled teams to identify **user causing performance issues** and trace the **exact code path of slow queries**.

Codedamn

08/2022 - 02/2023

Full Stack Developer - L3

Bangalore, India

- Built **DSA playground** for executing coding problems.
- Implemented **real-time collaborative coding mode** (multi-user editor).
- Built **autocomplete and IntelliSense system** for browser IDE.
- Optimized container allocation leading to a **55% cost reduction**.

Facilio

03/2021 - 07/2022

Member of Technical Staff

Chennai, India

- Built advanced **pivot table system** for cross-module analytics.
- Implemented **conditional formatting** and **script columns (custom computation engine)**.
- Enabled users to perform **spreadsheet-like dynamic analysis inside the product**.

PROJECTS

WatchWithMe (Flagship Product) <i>Real-time watch party platform (Web/Mobile/Ext.)</i> • Scaled to 7,000+ users with 6 paying customers. • Built real-time synchronized playback using WebSockets. • Integrated voice + video chat for shared viewing experience. • Solved cross-platform playback sync, latency & drift issues, and user onboarding & retention.	Live
Stardust.app <i>Infra Platform</i> • Built container deployment platform using AWS spot instances. • Added disaster recovery + one-command infra provisioning (Pulumi).	GitHub
Py-Compiler <i>Browser Python IDE</i> • Built secure client-side Python IDE with debugger support. • Enabled package installation and sandboxed execution inside the browser.	Live
Aegis <i>AI Analytics & Debugging System</i> • Built AI system to query production DB, logs, and tools using natural language. • Automatically generates queries, executes across systems (Postgres, CloudWatch, etc.), and analyzes results. • Enables rapid root cause analysis, user behavior insights, and debugging automation.	

ACHIEVEMENTS

Invited Speaker <i>Chennai Web Conf</i> • Talk: “Artemis: Personal AI OS” • Presented on building AI-native applications and personal AI systems.	Dec 2025
---	-----------------

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python
Frontend: React, React Native, Next.js, Tailwindcss, Shadcn
Backend: Node.js, GraphQL, Express, Flask, Django
Databases: PostgreSQL, MongoDB, Redis, MySQL
Gen AI & LLM: n8n, Langchain, Langgraph, Ollama, pg-vector
Cloud & DevOps: AWS, Serverless, Docker, Pulumi
Core Strengths: Distributed Systems, Real-time Systems (WebSockets, Collaboration), Observability & Debugging, AI-powered Tools

EDUCATION

Thanthai Periyar Government Institute of Technology <i>B.E Electronics and Communication Engineering CGPA: 7.21</i>	Vellore, India 2017 – 2021
